2. SAFETY GUIDE

Before working on the machine secure that the machine is in a safe condition, turned off, and if equipped with CE main switch the main switch should locked with a pad lock indicating machine is under service and repair. Best is always to unplug the machine from the electrical supply outlet. All work must be carried out by authorised and qualified personnel. Before commencing work all personnel should be familiar with the machine, together with the installation, operation and user manual originally supplied with the machine and any relevant arrangement drawings. Ensure compliance with all relevant site and international safety requirements. Appropriate protective foot, hand, eye and head gear must always be worn. Use other protective equipment to protect against hazardous/toxic fluids.

3. REQUIREMENTS TO DO THE REPAIR AND ASSEMBLY OF NEW PART(S)

Tool must not be used or repaired by persons not properly trained or knowledgeable with the assembly. Failure to follow the operating and assembly instructions or improper load positioning could result in strap breakage. Become familiar with the tool and keep fingers away from areas that can pinch or cut.
If in doubt contact our support team for further guidance and advice.

4. TOOL LIST FOR THE JOB

- Cleaning cloth
- Philips screwdriver small/medium size

5. SPARE PARTS DISMANTLING AND ASSEMBLY

T2-1-10130 Bracket is part of the Strapping Head Group of the Semi-Auto Pallet Strapping Machine and is connected to the following parts.

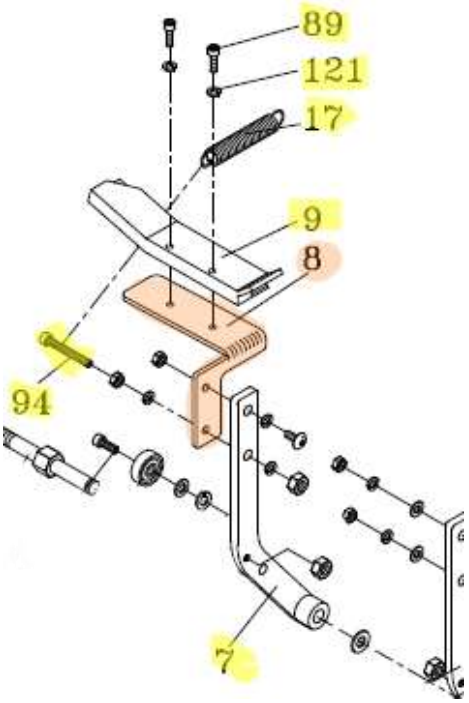

Figure D. Spare Parts T2-1-10130 Bracket are Connected To

ITEM NO.	DESCRIPTION
7	Heater Arm
8	Bracket
9	Bandway
17	Spring
89	HBS, M4x16
94	HBS, M5x50
121	SW, M4

Figure C. Strapping Head Group

Though the T2-1-10130 Bracket is part of the Strapping Head Group, it is actually interconnected with the Bandway Group. To install/replace T2-1-10130 Bracket:

1. Loosen parts Screw #89 and Washer #121 to free up Bandway #9.
2. Do the same on the bottom part to free up the Heater Arm #7, loosen the Screws #94 and the Lock Nuts.
3. The Bandway #9 will be installed on the **T2-1-10130 Bracket** #8, and Bracket #8 will be installed on Heater Arm #7.
4. The Heater Arm #7 will move together with the cam so as to open and close Bandway #9.

6. TEST OF COMPLETED ASSEMBLY AND MACHINE

Once the machine is assembled, secure that the machine is clean, oiled, and ready to run. Plug the machine, turn on the main switch, and let the machine warm up.

Secure that the strap is loaded and that the machine is warm. Do a test strap and follow up at least 4-5 times more to secure that everything is working perfectly.
