Hualian Skinpack 5478 Packaging Machine

Specifications	
Packaging Area	540 x 780 mm
Packaging Speed	40-50 packages per hour
Voltage	AC 380/50 (3PH), 220/60 (3PH)
Film Width	610 mm
Total Power	17 W
Net Weight	195 kg
Item number	43811020

Description:

The Hualian Skinpack 5478 Packaging Machine delivers high-quality skin packaging with a larger working area, ideal for a wide range of products. It wraps items in PVC or PE films without requiring molds, creating a secure, transparent "skin" that protects against dust and moisture. Designed for efficiency and durability, this machine is suitable for industrial settings, enhancing product display and protection.

Features:

- **Large Working Area:** 540 x 780 mm packaging area, accommodating various product sizes.
- **Mold-Free Operation:** Eliminates the need for molds, offering flexibility for different packaging applications.
- **High-Speed Processing:** Capable of packaging 40-50 items per hour, boosting productivity.
- **Dual Film Compatibility:** Supports PVC and PE skin films for customized presentation options.
- **Sturdy Construction:** Engineered for continuous industrial use, ensuring long-lasting performance.

Product Benefits:

- **Efficient Operation:** High-speed packaging enhances productivity, ideal for fast-paced environments.
- **Enhanced Product Display:** Transparent skin wrapping offers clear visibility, boosting product appeal.
- **Versatile Packaging Options:** Supports multiple film types and packaging sizes, adaptable for various needs.

Applications:

The Hualian Skinpack 5478 is versatile, suitable for food, daily chemicals, and seasoning packaging, providing a clear and protective seal. It supports tin foil and kraft paper bag packaging for added durability and is ideal for electronic components, ensuring secure, visible packaging.
