Hualian Skinpack 3954 Packaging Machine

Description:

The Hualian Skinpack 3954 Packaging Machine is designed for efficient and cost-effective packaging, creating a secure seal that enhances product presentation and protection. This versatile machine is ideal for applications requiring both durability and visual appeal, making it a perfect solution for industrial and commercial packaging needs.

Features:

- **High-Quality Skin Packaging:** Ensures a secure and transparent seal, providing excellent product visibility and protection.
- **Adjustable Temperature Control:** Allows precise control over sealing temperature, accommodating various materials and packaging requirements.
- **Efficient Vacuum System:** Ensures a tight and secure seal for optimal product protection.
- **Robust Build Quality:** Industrial-grade materials and construction for durability in high-demand environments.
- **User-Friendly Operation:** Simple controls and ergonomic design make it easy for operators to use and maintain.

Product Benefits:

- **Enhanced Product Protection:** The skin packaging method provides a durable and tamper-evident seal, ideal for protecting products during storage and transit.
- **Improved Product Presentation:** Transparent seal offers full product visibility, enhancing the customer's view of the packaged item.
- **Adaptable for Various Products:** Adjustable temperature and vacuum settings make it versatile for different packaging materials and product types.

Specifications	
Sealing Area	390 x 540 mm
Film Width	450 mm
Voltage	AC 220/50, 380/50 (3PH), 220/60 (3PH)
Power	11 W
External Dimensions (L×W×H)	1515 x 605 x 1355 mm
Net Weight	135 kg
Item number	43811010

Applications:

The Hualian Skinpack 3954 is versatile, suitable for food, daily chemicals, and seasoning packaging, providing a clear and protective seal. It supports tin foil and kraft paper bag packaging for added durability and is ideal for electronic components, ensuring secure, visible packaging.
