Hualian Skinpack 8080 Packaging Machine

Description:

The Hualian Skinpack 8080 is a powerful skin packaging machine designed for large items, providing a protective and transparent film wrap without the need for molds. With advanced features such as a slide mechanism, dual vacuum pumps, and high-speed heating, it is ideal for industrial packaging needs where durability and visual appeal are essential.

Features:

- **Large Working Area:** 800 x 800 mm area, accommodating larger items for flexible packaging.
- **Dual Vacuum Pumps:** Equipped with 2-3 pumps for secure and reliable sealing.
- **Slide Mechanism:** Facilitates easy product handling, simplifying the packaging process.
- **High-Speed Heating System:** Instant heat heating tube ensures rapid and efficient film application.
- **Heavy-Duty Design:** Built for industrial use, with durable construction for continuous, high-demand operations.

Product Benefits:

- **Efficient Operation:** High-speed heating and vacuum system enhance productivity, ideal for high-capacity use.
- **Enhanced Product Display:** Transparent skin wrapping offers clear visibility, boosting product appeal.
- **Adaptable for Large Items:** Accommodates larger products with a spacious packaging area and robust design.

Specifications	
Packaging Area	800 x 800 mm
Packaging Speed	20-50 seconds per cycle
Voltage	380V/50Hz (3PH)
Total Power	10,000 W
Film Width	880 mm
Net Weight	235 kg
Item number	43811030

Applications:

The Hualian Skinpack 8080 is versatile, suitable for food, daily chemicals, and seasoning packaging, providing a clear and protective seal. It supports tin foil and kraft paper bag packaging for added durability and is ideal for electronic components, ensuring secure, visible packaging.
