Gurki K-40D
Carton Erector

Specifications	
Carton Size Range	L: 250-450mm, W: 150-400mm, H: 100-400mm
Speed	Up to 12 cartons per minute
Power Supply	110/220V, 50/60Hz, single-phase
Power Consumption	Approx. 240W
Air Consumption	880 mm
Net Weight	450 NL/min at 6 kg/cm²
Machine Dimensions	2000mm (L) x 1900mm (W) x 1450mm (H)
Item Number	42121010

Description:

The Gurki K-40D Carton Erector is the ultimate solution for fast and reliable carton forming and sealing. Equipped with advanced automation technology, it delivers precise and consistent performance, accommodating a wide range of carton sizes. Designed for seamless integration into production lines, it maximizes efficiency while reducing downtime. This robust and intuitive machine is ideal for industries such as food, pharmaceuticals, and electronics.

Features:

1. **High-Speed Operation:** Processes up to 12 cartons per minute for quick turnaround.
2. **Versatile Carton Sizes:** Handles cartons ranging from 250-450mm (L), 150-400mm (W), and 100-400mm (H).
3. **Efficient Sealing:** Ensures secure, reliable sealing with minimal maintenance.
4. **User-Friendly Interface:** Intuitive PLC touchscreen simplifies operation and enhances user control.
5. **Durable Design:** Built with robust materials to ensure long-lasting reliability in demanding environments.

Key Product Benefits:

1. **Improved Efficiency:** High-speed operation reduces labor costs and boosts packaging line productivity.
2. **Flexible Carton Compatibility:** Accommodates a wide range of carton sizes for versatile applications.
3. **Reliable and Durable:** Engineered for long-term performance in high-demand industries.

Applications:

The Gurki K-40D Carton Erector is ideal for industries requiring efficient carton forming and sealing, including food processing, pharmaceuticals, electronics, and other high-demand sectors. It seamlessly integrates into packaging lines, ensuring accurate, reliable, and swift operations while maintaining exceptional product quality.
